Management Discussion And Analysis Report

OVERVIEW

As per the requirement of the Listing Agreement as part of the Directors Report or in addition thereto a Management Discussion & Analysis Report forming part of the 42nd Annual Report to the Members is given below discussing the key issues. All statements that address expectations about the future, but not limited to the Company's strategy for growth, product development, market position, expenditures and financial results, are forward looking statements. Since these are based on some assumption and expectations of future events, Company cannot guarantee that these are accurate or will be realized.

INDUSTRY STRUCTURE AND DEVELOPMENTS

The Conveyor beltings form an integral part of material handling system. It serves as a chain right from the stage of conveying semi-finished goods till final rolling out of finished goods. International Conveyors Limited is engaged in the manufacture and marketing of solid woven fabric reinforced PVC impregnated and PVC covered fire retardant, anti static conveyor belting in India since 1978 with a rich and valuable experience of 37 years.

Apart from providing easy and uninterrupted logistics support for material handling system it reduce the cost and other head expense thereby enabling the user to stay in the market at most competitive rates. With more than three decades of experience in research and development and manufacture and marketing of conveyor belting for underground mining operations. The main thrust areas of our specialization are the conveyor Belts for heavy Industries, Coal Mining, Potash Mining, Grain and Material handling Industries and green energy from wind turbine generators located across four states.

OPPORTUNITIES AND THREATS

Subdued steel prices and a slowdown in demand growth from China continued to weigh on the global steel sector in the past years which is impacting demand for Coal and consequently PVC Belting. For long wall mining, our plan for the future is to get mines enlarged by merging mines or opening a new large mine where long wall mining is possible.

Outlook for thermal (steam) generating coal is to be expected with price projections revised downward due to supply growing faster than demand. There is however, one important factor which strengthens the case for underground mining. The use of explosives in opencast mining affects the vegetation, soil and wildlife around the mine. Environmentally, underground mining is much better than opencast because it doesn't immediately affect the natural habitat. The proportion of underground mining would go up a bit in the sense of our understanding of new technology and opening of larger mines where new technology could be deployed.

We at International Conveyors Limited believes demand or competitive pricing as temporary and macro industry in which we operate has high demand and growth potential. Lower pricing is temporary phase as no quality manufacturer can sustain at non-remunerative prices for long.

SEGMENT-WISE AND PRODUCT-WISE PERFORMANCE

The segment-wise and product-wise performances of the Company are given in the notes to accounts for the year ended March 31, 2015.

Management Discussion and Analysis Report

OUTLOOK

India has set itself an ambitious target of increasing coal production from 565.77 million tonnes in 2013-14 to 1.5 billion tonnes by 2019-20 to reduce dependence on imports which is positive prospects for India's underground mining Conveyor Belt Business.

ICL has the ability to make conveyors up to 2500 kn/m in strength and belt widths up to 1800mm. This is the widest solid woven product range available from any one company and with a manufacturing capacity in excess of 1 million meters per annum.

The share of underground coal mining in India has slumped from 16.3% to 8.8% in the last decade. The primary reason is the rise in production from opencast mines, which is increasing at a greater rate than underground mines. Due to environmental concerns Government of India's major thrust is on underground mining and because of same the market for Conveyor Belt is expected to increase at the rate of 5-10% per annum including the replacement market. Accordingly, the market potential for Conveyor Belts estimated to increase.

The growth in production in the coal from underground mining industry in India, which is a major end-user of Conveyor Belts, is expected to drive higher demand for Conveyor Belts during the period 2015-2020.
